

WEKA DAY_1 QUESTIONS

1. Prepare a cross-validated ML model (k-fold, k=10) using multilayer perceptron classifier using iris.arff dataset in WEKA
3. Develop a ML model using J48 classifier using glass.arff dataset by splitting the dataset to training(80%) and testing(20%)
2. Use the iris.arff dataset in the WEKA to prepare a K-means cluster model
